

Bio 15**Study Outline Ch 25 Diseases of the Digestive System**

Disease	Causative Agent	Bacteria, virus, fungus, protozoa?	Disease signs and symptoms	Prevention or Treatment	Other notes
Shigella					
Typhoid Fever					
Salmonellosis					
Cholera					

Peptic Ulcer Disease					
Diarrhea by <i>E. coli</i>					

Differentiate between Toxigenic and Invasive Diarrheal Disease.

How are peptic ulcers diagnosed and treated?

List the virulence factors AND briefly describe how each one works to contribute to the pathogenicity of *S. aureus*.

Be sure to review in detail, the pathogenesis behind peptic ulcer disease, shigellosis, salmonellosis, and cholera.
